

FLANNERY

PRODUCT SPECIFICATION

AVAILABLE COLORS:

SILVER ANODIZED

BLACK ANODIZED

FLANNERY

Overview

Our flannery extrusions are designed to conceal and decorate the seams of STRATAWOOD, PIXL, FELTLAP and other PET products. T-trim is intended for the seams where 2 panels meet, and side trim is for finished edges/corners.

Stratawood	1.50"[38.10mm]	.87"[22mm]	.18"[4.6mm]

FLANNERY EXTRUSION

Installation overview

1 - Drill through-holes in the flannery according to your chosen fastener size. Carefully measure the installation space, cut Flannery to size and install the extrusions directly to the installation surface.

2 - Install the panels within the flannery slots, according to the detailed installation instructions included with each product package.
